### **City of Santa Barbara Selects Sequoia Lighting**

The City of Santa Barbara has selected a variety of outdoor lighting fixtures and replacement products from Sequoia Lighting Corporation for its ongoing street lighting upgrades.

The streets of Santa Barbara are lined with older, classically styled streetlights that reflect the city's rich history. Because of their age, the streetlights are in need of restoration. While the exteriors of the streetlights are being refurbished, the antiquated electrical components will be replaced with new, HID retrofit kits from Sequoia Lighting. When completed, the beautiful nostalgic streetlights will emanate strong, energy efficient light.

In addition to the streetlight restorations, Sequoia Lighting will furnish and install new nostalgic and contemporary styled fixtures in several locations throughout the city including city parks, public buildings, community centers and parking lots.

For more information on the complete line of Sequoia Lighting products, call 877/888-7880 or visit Sequoia Lighting's web site at [sequoialighting.com](http://sequoialighting.com).
