

# TYPE 9A PULLBOX

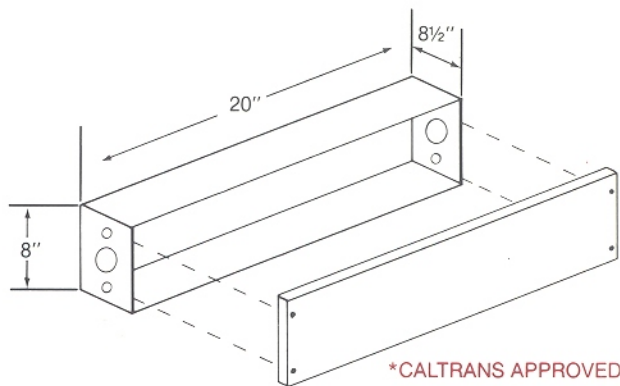

Meeting the department of transportation requirement, the Type 9A Pullbox is designed for use in all types of concrete barriers. Typically used in the harshest of roadway environments, the Type 9A Pullbox provides maximum protection against moisture. The lid is fully gasketed with a neoprene gasket and securely attached with four stainless steel bolts. Each Type 9A Pullbox is manufactured from heavy gauge steel which is hot dip galvanized after fabrication to assure a long, trouble-free life. Every Type 9A Pullbox is provided with 1½" and 2" knock-outs on each side for easy conduit access.
